

Aqua Packs

Aqua Packs are a dry granular powder containing enzymes and facultative spore-forming bacteria, packaged in a convenient, easy to use water soluble bag. Simply toss the 1 pound bag in grease traps, lagoons, septic tanks, or lift stations, and the package dissolves, releasing billions of bacteria and enzymes into the system. This product contains hybrid bacteria cultures that have ability to liquefy and digest complex animal and vegetative oil and greases, protein, cellulose, starch, and sugar. As a powder, this product can be easily stored in its reusable plastic pail without the fear of activity loss. It does not contain strong acids or alkaline materials. It's cultured bacteria and enzymes are so specific in their action, and function so rapidly, the waste is quickly broken down, reducing BOD and COD levels, and eliminating odors. Furthermore, this product is certified to be Salmonella free.

FEATURES

- *Heat Resistant
- *Reduces Suspended Solids
- *Reduces Sludge Volume
- *Reduces BOD
- *Rapid Bacteria Replication
- Non-Pathogenic Bacteria

APPLICATIONS

- *Grease Traps / Drain Lines
- *Waste Treatment Facilities
- *Septic Tanks
- *Marine Holding Tanks
- *Lift Stations

TECHNICAL DATA

Dilution.....	Ready to use
DOT.....	Not regulated
Odor.....	Bland
pH.....	N/A
Physical appearance.....	Tan Powder
