

Emulsion

Emulsion is a highly aggressive 23% Hydrochloric acid emulsion bowl and urinal cleaner. It has been carefully formulated with combined detergents that give excellent wetting and penetration characteristics. The high acid content of this product gives better performance at an economical price. This emulsion bowl cleaner is for use on solid porcelain commodes, toilet bowls, urinals and troughs. By fast contact action, it will remove mineral encrustations, scale, rust, organic deposits and stains quickly and economically.

FEATURES

- *Ready to use liquid
