

Green Float

Green Float consists of a blend of petroleum hydrocarbons and orange terpenes. It is a floating combination of solvents used primarily to dissolve grease and scum that accumulates in grease traps, pumping stations, wet wells, and sewer lines. Green Float can also be used for removal of many printing inks, rosins, ester gums, alkyd resins, tar and asphalt.

FEATURES

- *100% active
- *Fast acting
- *Acid-Free

APPLICATIONS

- *Floating degreaser
- *Tar and asphalt remover

TECHNICAL DATA

Dilution	Ready to use
DOT.....	Not regulated
Odor.....	Citrus
pH.....	N/A
Physical appearance.....	Green liquid
