

Renew Protectant

Renew's protective shield helps maintain a long lasting attractive appearance while guarding against the damage caused by ultraviolet rays, environmental conditions and everyday use. It preserves virtually all plastic, rubber, vinyl, plexiglass, acrylic, leather and wood surfaces. It leaves a protective coating which is less greasy and which lasts longer than the coating provided by other products. This product's penetrating formulation creates a barrier which resists cracking, dulling, hardening and fading, which is common in untreated surfaces.

FEATURES

- *Cost effective
- *Water Based
- *Solvent-Free
- *Phosphate-Free

APPLICATIONS

- *Leather
- *Vinyl
- *Rubber
- *Tires

TECHNICAL DATA

Dilution.....	Readt to use
DOT.....	Not regulated
Odor.....	Bland
pH.....	8.0-9.0
Physical appearance.....	Milky white liquid
